PROJECTS

Insight-Gazer | React, TypeScript, Node.js, Gemini AI

June 2025 – Present

- Built an AI-powered product insight engine that analyzes raw customer reviews to detect key features, sentiment trends, and priorities using Google Gemini.
- Developed a full-stack application with React + TypeScript frontend and a serverless Node.js backend deployed on Vercel
- Implemented CSV review uploads and converted unstructured feedback into structured JSON summaries for actionable insights

Reading Portfolio | HTML, CSS, JavaScript, Anime.js, Turn.js

Jan 2025 – Apr 2025

- Created an interactive website showcasing a personal reading journey with multiple UI techniques and scripting components
- Implemented 3D book slider, flipbook effect, parallax scrolling, quiz-based book recommendation, and virtual bookshelf
- Leveraged Anime.js for animations and Turn.js for realistic page-flip interactions to enhance user experience

Sentimint | Flask, Python, VADER Sentiment Analysis, TailwindCSS

Aug. 2025

- Developed a sentiment analysis web app with a clean, mint-themed UI providing instant emotional tone feedback on text input
- Built backend using Flask integrated with VADER sentiment analysis to interpret casual and social text
- Implemented live sentiment display with emoji icons and dark mode toggle for enhanced user experience
